

SSO log in process

Now that the single sign-on system is set up, your users are able to log into Dimensions using their institutional login details. This works as follows -

1. The user goes to app.dimensions.ai, and clicks on “Login” in the top right corner of the page.

2. On the next screen the user enters their institutional email address.

3. This will be recognised, and the user will be redirected to the institutional SSO login page for authentication. (PLEASE NOTE - The first time that a user does this, they will be required to confirm their identity by a verification code which is sent to their email address, and must then be input into system before continuing.)
4. Once the user is authenticated, they are automatically returned to the Dimensions page where they will be logged in, see all four data types, and be able to save searches and export results lists (with up to 5,000 results per download).
